SWITZERLAND Portfolio

Current Progress vs. Liquidation Patterns

Generative AI Summary

Based on the analysis of 3 grants in Switzerland, all 3 grants fall within the red shaded area, indicating they are expected to leave behind unliquidated balances and require intervention from project officers or program leaders. The red shaded area, which represents grants with less than 100% percent liquidation pattern, is calculated using Switzerland Area Data to identify liquidation trends. Notably, there are no grants above the pattern, highlighting a concerning trend where all grants are at risk of not fully liquidating their obligations. This situation necessitates immediate attention to ensure efficient liquidation and prevent potential financial discrepancies.

Liquidated vs Unliquidated Obligations	Total Number of Grants
