UGANDA Portfolio
Current Progress vs. Liquidation Patterns

Generative AI Summary

Based on the analysis of 4 grants in Uganda, all 4 grants fall within the red shaded area, indicating they are expected to leave behind unliquidated balances and require intervention from project officers or program leaders. The red shaded area, which represents grants with less than 100% percent liquidation pattern, is calculated using Uganda Area Data to identify liquidation trends. Notably, none of the grants exhibit a normal liquidation rate, as all points are below the expected threshold, highlighting a concerning trend in grant obligations that necessitates immediate attention to facilitate efficient liquidation and prevent unliquidated balances.

Liquidated vs Unliquidated Obligations	Total Number of Grants
